PROFILE

Full-Stack Developer with 4+ years of professional experience shipping production web applications with React, Next.js and TypeScript, now building complete products end-to-end with Node.js, Express, Prisma and PostgreSQL. Strong focus on performance, accessibility and clean, strictly typed code. Uses AI-assisted development (Claude Code, GitHub Copilot) daily as a pair programmer — owning architecture decisions and reviewing and testing every change. Experienced in international, remote-first teams.

WORK EXPERIENCE

Frontend Developer — Rhapsody Media (UK-based) *June 2022 – July 2026*

- Rebuilt and optimized key pages, raising the Lighthouse performance score from ~60 to ~90 (+30 points)
- Architected and built the company website from scratch with Next.js and Strapi (headless CMS), using code splitting and lazy loading for performance and scalability
- Integrated REST APIs and headless CMS backends (Strapi, Sanity); built content-driven sites with Next.js and Astro
- Shipped customer-facing features and pages used by 500+ users, working closely with design and backend teams
- Introduced a reusable component library and stricter TypeScript types, reducing bugs and development time
- Built a data-driven calculator with interactive charts and PDF report generation (Chart.js)
- Improved SEO with structured data, increasing search rankings and visibility
- Contributed to sprint planning and code reviews in an agile team of 6 engineers, used AI tools to ship faster while keeping quality through review and testing

PROJECTS

GarageLog — Full-Stack Car Maintenance Tracker (built solo, v2) *2026*

Live demo: garage-log.vercel.app | Code: github.com/miloss98/garage-log

- Designed and built a REST API with Node.js, Express 5, Prisma and PostgreSQL to replace the original Supabase backend; JWT auth in httpOnly cookies, served first-party through a Next.js proxy
- Hardened the API: centralized error handling with typed HTTP errors, Zod validation, Helmet, per-email login rate limiting and versioned database migrations
- Built service reminders by date or mileage, an expenses dashboard (SQL aggregation with accessible charts) and a one-click demo that creates isolated, self-cleaning demo accounts
- Frontend in Next.js 16, TypeScript, TanStack Query, React Hook Form + Zod and Tailwind/shadcn: light/dark theme, mobile-first app shell, WCAG-checked colors
- Documented the API with OpenAPI 3.1 generated from Zod schemas (interactive Swagger UI); deployed on Vercel and Render; built with Claude Code as an AI pair programmer

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Astro, Tailwind CSS, styled-components, shadcn/ui, Material UI, Chakra UI, Sass/SCSS, Responsive Design, Web Accessibility (WCAG)

Backend: Node.js, Express.js, PostgreSQL, Prisma, Sequelize, SQL, REST API design, JWT authentication, Zod, OpenAPI/Swagger

State & Data: TanStack Query, Redux Toolkit, Zustand, React Context, React Hook Form, Axios, GraphQL, Chart.js, Highcharts

CMS & Platforms: Strapi, Sanity, Supabase, Neon, UploadThing

Testing: Jest, Vitest (in progress)

AI Tools: Claude Code (certified), GitHub Copilot, ChatGPT, Gemini

Tools & Workflow: Git, GitHub, Vercel, Render, Netlify, Vite, Figma, npm, Yarn, ESLint, Prettier, Agile/Scrum, code review

EDUCATION

Bachelor's Degree, Computer Science — Sinergija University, Bijeljina *2018 – 2022*

LANGUAGES

Serbian (Native) | English (Proficient)
